

Dual Channel ABS - A light weight and compact Dual Channel ABS (Anti-lock Brake System) is installed on both the front and rear wheels. ABS is the supplemental system which automatically controls the braking force efficiently and avoids wheel lock up due to the slippery road, the sudden change of road conditions or excessive braking in a certain controllable range.

GIXXER SF 250 comes with an advanced Fuel Injection Technology equipped with 6 sensors to calculate the optimum amount of fuel to be injected for better combustion efficiency, thereby improving fuel efficiency and providing accurate throttle response at all rpm to make your every ride even more exciting.

Suzuki Oil Cooling System (SOCS) - Oil cooling system in engines was first introduced by Suzuki to the world for creating light weight and fast engines which provides high performance for a wide range of needs, from city-riding in traffic to serious sport riding using technologies derived from MotoGP such as weight-reduction and friction-reduction technologies. This unique technology also offers a refined acceleration that feels strong and linear. GIXXER SF 250 engine provides high output, compactness, low fuel consumption, high durability and ease of maintenance.
